

Educational Virtual Training Program

PIPELINE INTEGRITY MANAGEMENT SYSTEM

28th to 29th August 2020

OBJECTIVE

Pipeline Integrity Management techniques are essential for maintaining a safe and reliable pipeline asset. Based on the operators need, a pipeline may be assessed with a combination of various integrity tools during the life of a pipeline such as ILI, DA and Pressure Test. Each integrity assessment tool complements the other and do not have identical performances, rather each has an advantage over others. Essentially, there are three ways to confirm the physical condition of pipelines; Monitoring, Testing and Inspections covering under Integrity Management.

This will also dig deeper into the pivotal role of Coating, Cathodic Protection (CP), AC/DC Interference detection and mitigation and how it relates to the overall pipeline integrity.

WHO SHOULD ATTEND?

Personnel engaged in planning, design installation, testing and commissioning, monitoring and maintenance of pipelines through corrosion protective coating, cathodic protection system, and other methods / techniques for prevention and control of corrosion of steel pipelines and its control.

CLASS TIMING

09:00 hrs – 14:00 hrs

FACULTY

The faculty includes professional experts from organizations & Institutions.

REGISTRATION

Enrolment is accepted on a first come first serve basis, as seats are limited. Participation Certificate will be issued after the course.

TOPICS TO BE COVERED

- Introduction to Integrity Management Plan
- Materials and Design
- Pre-Design Survey
- Coatings
- Pre-Installation Integrity
- Integrity Assessment Tools - DA
- Data Analysis and Interpretation
- Risk Assessment
- Regulatory Requirements

COURSE FEES & ONLINE PAYMENT DETAIL

INR 5000 + 18% GST (INR 900) = INR 5900 per delegate

Advance payment through online mode is mandatory for registration confirmation. 10% discount to NACE member. Limited seats only.
